*T.V. Shakhmatova, Ph.D. in Pedagogical Sciences,
Director of Nikopol branch of European University
postmaster@nikopol.e-u.in.ua*

Research methodology. Using the method of interpretation the features of the existing legal framework of higher education on a regulatory specific space of innovations were revealed. Using the method of analysis of the current state and peculiarities of the processes of development of educational process entities were characterized. Due to the factor analysis, the definition of criteria of readiness of entities to innovation activity was conducted. The role of modern innovative technologies in management of competencies development of future academic managers was analyzed.

Results. For the formation of a new generation of managers of the educational institution it was offered to use the innovative forms and types of classes and primarily didactic games and training technologies. Specific advantages of using these games and technologies in formation of professional competence of the head of educational institution were shown.

Novelty. The essence of the modern understanding of the pedagogical innovations and the conditions and criteria for their successful implementation were disclosed. The causal links between innovative approaches to training of future head of the educational institution and the level of his/her competence were established.

Practical significance. Legal basis of innovative development of entities of educational process and the algorithm of competencies development management of future managers of educational institutions, which can be implemented during the training of Master degree students of major “Educational Institution Management” were justified.
