**Research Methodology:** The potential of enterprise economic security and identification of its constituents is investigated by means of systemic approach elements. In addition the scientific methods of analysis, formalization and detalization were used. Besides the special research methods of classification and systematization are used.

**Results:** The cause and effect connection between the enterprise potential and the level of its economic security is established. The potential of economic enterprise security is identified as the basic component of potential. The formation and current state of energy security of Ukraine as a component of economic security were analyzed. The potential decomposition of enterprise economic security, that on the official level consists of separate rights possibilities, processes and competences. The structural decomposition envisages the object, subject and integral constituents and relations between them.

**Novelty:** The author's view on the essence of enterprise economic security through its potential is revealed. The essence of the notion “potential of enterprise economic security” is formulated.

**Practical Significance:** The new view on the notion of enterprise economic security is offered, as the state of the most efficient use of its potential that provides the possibility for the enterprise to implement its interests by means of balancing with other subjects and threats elimination and stable enterprise development provision currently and in the future. The definition of the potential of enterprise economic security, which appears to be the dynamic complex of irights, possibilities, resources (processes) and competences, that aim to protect vitally important interests and provision of its stable functioning and sustainable development in the future, is offered.
