**Research Methodology:** With the help of the systematic approach to the system of accounting and analytical provision of the enterprises economic security, as well as organizational and economic mechanism of the process to strengthen it were investigated.

**Results:** The factors that affect the analytical component of management of the economic security strengthening process were analyzed. It was defined that at the present stage the establishment and development of a dynamic concept of accounting in general and in particular the accounting policies, which should be a tool, structuring and coordinating accounting and analytical provision of the system of economic security, seem to be relevant.

**Novelty:** It was offered to use of the accounting policies as a mechanism that enables the practical application of the technique of accounting policy formation, taking into account changes in tax legislation.

**The practical significance:** On the basis of the improved technique of the economic security research, practical recommendations that can serve as a scientific basis for the formation of forecasts, strategies and programs in the construction of the integrated system of the accounting policy were developed. It will promote the economic security of the enterprise.
